To Whom It May Concern:

We currently use 11 7-ton buggies purchased from Youngs Machine Company. They haul an average of 35 tons per unit and pull a 12% grade incline coming out of the mine. Fuel consumption is approximately 15 gallons during our 10 hour day. In that 10 hour day, a buggy will make a 5 mile trip 5 to 6 times. Maintenance on the buggies is minimal. We have used Young's products since we began our mining operations five years ago and have been very satisfied with their performance.
